

Hi, folks! 🙋

---

I'm Rhys, a developer in training from Melbourne, Australia. I'm currently enrolled in the Coder Academy Flex Track Bootcamp and loving it!

I currently work as a small animal veterinarian, quite a different field to software engineering. There's surprisingly a lot of crossover, however, and I've found the steps in diagnosing and fixing a programming error very similar to the systematic approach you take to diagnosing a problem in veterinary medicine.

I'm passionate about good design, UI/UX and lifelong learning.

## Technologies & Languages

 CSS-3  HTML-5  SASS  Javascript  Node-Package-Manager  Git

## Outside Work 🌞

In my spare time I restore mid century furniture, mostly dating from the 1950s and 1960s. I really love the design aesthetic of the period: clean, fluid lines and natural finishes.

You can find my instagram with some of my work [here](#)
